

Radiation Solutions Inc. acquires RMS Instruments Limited, Expanding Innovation and Market Reach

Mississauga, ON — November 12, 2025 — *Radiation Solutions Inc.* (RSI), a global leader in advanced radiation detection and monitoring technologies, is pleased to announce the acquisition of *RMS Instruments Limited* (RMS), completed on **November 7, 2025**.

For more than four decades, RMS has been recognized for its groundbreaking work in the research, design, and development of **aeromagnetic real-time compensators, data acquisition systems, VLF-EM receivers, and chart recorders**. The company's longstanding reputation for technical excellence and outstanding customer support, complements RSI's commitment to delivering high-performance, reliable instrumentation solutions.

*"This acquisition represents an exciting milestone for RSI. By welcoming RMS into the RSI family, we can leverage our combined strengths," said **Jens Hovgaard, CEO of Radiation Solutions Inc.***

RMS will continue to support its customers and operate as an independent entity. RSI's experience will enhance RMS' ability to deliver state-of-the-art, customer-driven solutions for evolving industry needs.

About Radiation Solutions Inc.

RSI is a global leader in the design and manufacturing of radiation detection systems for **environmental, industrial, and geophysical** applications. RSI is committed to innovation, precision, and customer satisfaction.
