

RELEASE NOTES

CDW300 Control & Display for Windows v2.30

These release notes contain important information about the new software and how it will affect the performance of systems in which it is installed. The notes include information about enhancements, adaptive changes, and corrections to known problems. Please read this documentation carefully.

Compatibility:

Rtg300 – v1.23
GP300 FW – RMS1780-00-J

Documentation:

CDW300 Control & Display for Windows User's Guide v1.03

Installation:

See Section 1.8, CDW300 Control & Display for Windows User's Guide v1.03

1. The configuration upload function (*File → Load From GP300*) is more reliable. In previous releases, false time-out conditions could be reported when the baud rate from the configuration file was not the one actually being used.
The modifications do not change the user interface.
2. Startup (choice of a COM port and its operating parameters, configuration of the COM port, detection of GP300) was modified for greater stability, better recovery from abnormal conditions, and more accurate messages to the operator. The user interface was changed very slightly.
3. The startup modifications were made in parallel to modifications in Rtg300. See *Rtg300 Software Release Notes for Rev 1.23*.
