

RELEASE NOTES

PDb300 Windows NT Printer Driver (B&W) – Vers.1.1

1. This release installs a version of the driver named RMS PDB300. This replaces the previous version (1.0), which installed a driver named RMS GP300 B&W.
2. The driver now supports metric-size papers: A3 (297 x 420 mm) and A4 (210 x 297 mm).
3. The driver now also supports 11 x 17-in paper. A summary of paper sizes supported follows:
 - RMS 11 x 17 in
 - RMS 8.5 x 11 in
 - RMS 8.5 x 11 in Transverse
 - RMS Max (11.84 x 19 in)
 - RMS Square (11 x 11 in)
 - RMS A3 (297 x 420 mm)
 - RMS A4 (210 x 297 mm)
 - RMS A4 Transverse

With paper sizes labeled with the word 'Transverse', pages are rotated 90 degrees from the normal orientation. This makes optimum use of the surface available on the GP300's paper, while also easing the viewing of the output.
